EXAMINER'S AMENDMENT

The application has been amended as follows: Cancel claim 14.

Claim 14, originally listed as Claim 15 by the Applicants, has been renumbered due to the lack of an original claim 7, under rule 1.126. Since this was a non-elected claim it is necessary for it to be canceled for the case to issue.

Allowable Subject Matter

Claims 1-13 are allowed. Note that there was no original claim 7, thus claim 8 and the claims following it have been renumbered under rule 1.126.

The following is an examiner's statement of reasons for allowance: at a minimum, the prior art does not show nor fairly suggest a substrate and vibrator with pins holding the vibrator from the substrate wherein the pins are themselves held by a conductive adhesive made of resin including a conductive filler that has a pencil hardness of about 4H or less furthermore being thick enough so that vibrations are sufficiently buffered in the structure. The prior art reference of the IDS, JP 2000 146593, does not suggest use of a resin as a conductive filler, a pencil hardness of 4H or less or one that is intended to buffer vibrations. Instead that reference notes a hardness of 6B for the purpose of temperature compensation. Further the reference does not show a substrate

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

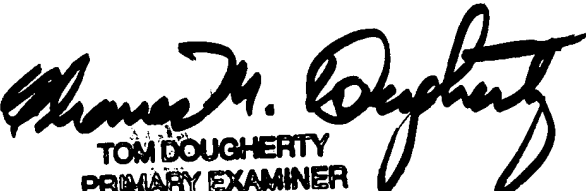

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The citation of the prior art is intended to show the grading of pencil hardnesses.
